Full Stack Web Developer

Experienced software designer with quality assurance and supervisory experience. Possesses strong leadership and team-building skills. Serves as a team leader to manage problem solving issues on a weekly basis. Quick learner, collaborative and creative. Works well under pressure and adapts to new concepts. Strives to write simple efficient code and contribute to the developer community.

TECHNICAL SKILLS

Ruby | Rails | SQL | Javascript | React | Django | Redux | Python | HTML | css | Bootstrap

TECHNICAL PROJECTS

Pet-Assistant Frontend Backend | **Demo**
Keep track of important dates and notes for all your pets
- Used React as the frontend framework to create a single page application
- Used Redux to handle state between multiple components
- Used css and javascript to create a responsive navigation bar and layout

Fortune Teller api/client Frontend Backend | **Demo**
Ask a question and let the cards answer for you with multiple tarot spread options
- Created a rails api backend with Postgresql to handle CRUD/DataBase
- Created a javascript front end to connect to the api
- Used bootstrap to create a simple UI design

Book Review App Ruby on Rails - Github | Demo
Signup or login with google to read, write and comment on book reviews.
- Used rails for CRUD actions and to connect to a sqlite3 database
- Created a login system that allows new users to sign up with the site or login with a google account.
- Used embedded Ruby to render views with data from the controllers

Virtual Bookcase with Sinatra - Github | Demo
Organize and keep track of your books with this virtual bookcase
- Used Ruby with the Sinatra framework and object oriented programming
- Created a login system
- Implemented proper MVC structure
